

## Critical Notification Announcement

### [UPDATE] Security vulnerabilities related to Apache Log4j2, CVE-2021-44228 and CVE-2021-45046

**Issued:** December 16, 2021

#### Update

In addition to the critical security vulnerability related to Apache Log4j2, described in [CVE-2021-44228](#), a second vulnerability, [CVE-2021-45046](#) was introduced. Infor continues to provide general and solution-specific information related to both Apache Log4j vulnerabilities and to develop updates and patches where appropriate to help mitigate these issues.

#### Action Steps

Please see master Knowledge Base (KB) article [2229037](#) for:

- General Apache Log4j information
- Solution-specific status updates and links to information.

Use the 'Sign up' feature in the KB header to receive notification when new information is available and to be updated on this issue.

Thank you for your continued patience and support.

*The purpose of Critical Notifications is to inform you of urgent changes that have been implemented via a solution or workaround or to provide an explanation of actions you may need to take. Critical Notifications only pertain to the release(s) indicated in this document. These notices are not normally backward or forward compatible. The alert notice will remain in effect until that release has been retired or an end-date has been specified. Any questions regarding this Critical Notification should be directed to Infor Support.*
